

LEAK-RESISTANT CARRIERS FOR HOSPITALS

- Absolutely Safe for Operating Personnel
- No Outages and Added Costs for Cleaning the System
- Easily Exchangeable Color Coding Rings
- Two Liter IV Bags can be Transported in Six Inch Tube Systems
- Built for the North American Market

Liquids can escape from carriers with leaks from tubes or containers and contaminate the pneumatic tube system. Subsequent carriers can then spread such contaminants throughout the system. As a result, time consuming and costly cleaning is necessary. While the tube system is being cleaned, the system is not operating causing additional costs for runners.

Carrier with Test-Tube Insert

Our new Carriers are equipped with seals, which prevent liquids from escaping when properly used. In the event that a payload leaks, only the affected carrier must be cleaned. This ensures trouble-free operation of the system and reduces the risk of infection.

Carrier with Interchangeable Color Coding Rings

EXTENSIVE LINE OF ACCESSORIES

- Inserts for Test Tubes
- Pocket Inserts
- Locking Clips
- Colored Coding Rings

FEATURES

- Caps with seals on both carrier ends
- Wide carrier bands which ensure smooth transport, gentle braking and permit a greater transport weight
- Color coding rings are easy to exchange and re-use

Part No.	Model	Dimensions (L X W)	Tube Diameter	Arc Radius	Colored Rings
RP 44924	4"	14" X 3"	4"	36"	
RP 43411B	6"	14" X 4 1/2"	6"	36"	X
